

Montague Launches New Folding Mountain Bike for Off-Road Vehicles Folding Paratrooper Highline Stores Easily in Utility Vehicles and can be Taken Along for the Ride

CAMBRIDGE, MA – June 30, 2016 – [Montague Bikes](#), the leader in full-size folding bikes, has launched the all-new [Paratrooper Highline](#), a high performance mountain bike designed to handle the roughest trails and still fold easily for storage in a vehicle. Its full-size wheels and folding design offer the perfect solution to those looking for a versatile bike to take with them as they tackle the challenge of off-road driving then continue the fun with biking on backwoods trails.

Originally designed for use by military paratroopers dropping into combat, the Paratrooper Highline represents the ultimate in rugged portability. The bike is well-equipped with a 20-speed Shimano drivetrain, hydraulic disc brakes, and Rockshox suspension to provide superior trail performance. Its 27.5 inch wheels and wide 2.1" tires allow the Paratrooper Highline to easily roll over obstacles and rough terrain and still fold into the cargo area of an off-road vehicle when the ride is done.

Heavily modified off-road vehicles are often very limited on storage space. A bike that fits in a tight space and delivers a stiff and responsive ride on the trail is very appealing to off-roaders who enjoy their time in the great outdoors.

When folded, the bike compacts to just 36 inches wide, 28 inches high and 12 inches deep, ideal for the back of a jeep, SUV or even a car trunk. It also weighs only 29 lbs, making it very light and portable. The bike's industry standard components make repairs and customizations possible at any bike shop.

Like all Montague bikes, the Paratrooper Highline includes the patented DirectConnect™ folding system that provides increased frame stiffness for superior ride quality, and can be folded and unfolded in less than 20 seconds. The Paratrooper Highline retails for \$1,249.00.

"The Paratrooper Highline is the perfect complement for off-roading as it can help extend the day's adventure and allow drivers to continue conquering the roughest trails by bike." said Ryan Walas, Director of Marketing for Montague Bikes. "We focus on performance and ride quality first, and that is exactly what riders get with the Paratrooper Highline. It's loaded with features to handle anything from challenging downhill runs to all-day riding on all types of terrain."

The Paratrooper Highline is part of Montague's 11 all-new bike models for 2016 that feature the same folding frame design. The 2016 line-up includes six road and five mountain bikes ranging in price from \$639.95 to \$2,449.00.

About Montague Corporation

Montague Corporation is based in Cambridge, Massachusetts USA and is dedicated to advancing cycling through the development of inventive technologies that provide its customers with an unprecedented combination of performance and convenience. Montague has been manufacturing bikes and bike components for 25 years.
