Pop a Wheelie

... into the trunk, that is. Discover a new, free-wheeling you with a state-of-the-art folding bicycle by SwissBike. The full-size **TX Commuter** folds down in less than 30 seconds and weighs only 30 lbs. The manufacturers adapted the best qualities of a mountain bike (front suspension, disc brakes, 21 gears) to create an urban bike that's also good for off-road jaunts. It retails at \$699—that's how many cab rides? Plus it's good for the environment. Win-win. swissbike.com

Made by Massachusetts-based Montague Corp., the 2009 SwissBike has 26-inch wheels that click off easily, no tools required.
