► **A Full-Sized Bike That Folds**

Montague SwissBike's new line of full-sized, high-performance bikes feature patented technology that allows them to fold in half for easy storage and transport. Originally developed to allow military paratroopers to airdrop with a mountain bike, the bikes are ideal for cyclists who need a full-sized mountain bike but also have storage, commute or travel constraints. The flagship SwissBike XO is suited for all terrains and demands. The LX and TX models are for less-intense uses and are for riders on a budget. For more information, contact Montague Bikes at (800) 736-5348 or www.montagueco.com.
